# Bug Fixes & Minor Inclusions

# Bug Fixes and Minor Inclusions

**FS#59308** - Error When Toggling User Log Searches – Toggle Search button now working. Fixed.

**FS#60270** - eBay Lister remembers old defaults when trying to re-upload older items - eBay Listing screen now has a button in the tool bar to reload the eBay listing model.

This will ensure that if the auction item type defaults are changed, clicking this button will reload the model with the latest data.

On the same screen in the Previous Items panel, it is now possible to right-click on a cell and replace the current data in the draft listing with the data from the cell.

Note: This is only implemented for certain cells.

**FS#59433** - Have to double tab to change between year fields find parts screen – This was a bug with cursor focus not being correctly set, so the tab order was not correct. Fixed.

**FS#59427** - Errors trying to print a delivery manifest - Bug occurred with the preference "ebay.post.trackingnumber.on.manifest" set. Fixed.

**FS#59870** - When invoicing parts Pinnacle will always select the "real" model rather than the requested model regardless of what the site preferences are set to – Fixed to allow quotes / invoices to display requested model if set to do so in site preferences.

**FS#60168** - Issue with blank secondary eBay category causing eBay-generated errors - When listing certain part types (Left Door Mirror, Rear Bumper and Rear Wiper Motor) eBay is returning error for Invalid/null secondary category when secondary eBay category field is left blank. Fixed.

**FS#59235** - Whenever using free test search for an IC line that is not in stock an IllegalArgumentException error was returned - Function is now able to work without an exact model alias match. Now returns results on first matching model ID, or returns "UNKNOWN" if no relevant option found.

**FS#59230** - In Workorder Manager if you try to assign a task to a user then enter a pincode the Workorder Manager resets and has to be closed and reopened before you can see any jobs - Fixed.
